EXHIBITOR PROSPECTUS

13th New York & New Jersey Pain Medicine Congress

November 7-10, 2024 • The Hyatt Regency Jersey City, New Jersey

Message from our Chairman and Course Directors

Dear Colleague,

On behalf of the Founder and Chairman Sudhir Diwan, MD, and Vice Chairs Scott Woska, MD, Christopher Gharibo, MD, and Course Directors Andrew Kaufman, MD, Robert Tiso, MD, Sayed Emal Wahezi, MD, Latrice Akuamoah, MD and the New York and New Jersey Societies of Interventional Pain Physicians (NYSIPP & NJSIPP), we would like to invite you to join us at the New York and New Jersey Pain Medicine Congress: Evolving Advanced Pain Therapies. This year's meeting is being held November 7-10, 2024 at the Hyatt Regency Jersey City, New Jersey.

The NYNJ Pain Medicine Congress was established in 2010 with the primary objectives of educating health care professionals to promote the development and practice of safe, high quality, cost effective interventional pain management techniques for the diagnosis and treatment of pain and related disorders, and to insure patient access to these interventions.

Our scientific program will provide state-of-the-art information on advanced pain management techniques, pharmacology, neurostimulation, vertebroplasty, kyphoplasty, discography and intradiscal procedures, radiofrequency, peripheral nerve stimulation, intrathecal therapy, percutaneous facet fusion and sacroplasty among others. This course will offer a half day hands on cadaver and ultrasound course, incorporating didactic lectures with the hands-on practice for improved technique and patient outcomes for interventional procedures.

Industry Partners and technical exhibits are an important part of our meeting's success and benefit both the attendees and the companies who choose to participate. We anticipate in excess of 800 clinical providers specializing in pain management, interventional pain management and neurosurgery to attend, including: physicians, mid-level practitioners, fellows, residents, nurses and pharmacists.

We are anticipating a full exhibit hall and space will be limited. To ensure your chances of securing exhibit space and support opportunities, please review the enclosed prospectus materials carefully and send completed applications to ksokol75@gmail.com.

We look forward to receiving your commitment and working together at the 2024 New York and New Jersey Pain Medicine Congress.

Program Needs Assessment

Interventional Pain management incorporates interventional treatment options for patients to reduce or eliminate the need for chronic conventional medication management (and/or opiate therapy). Interventional treatment options include: spinal cord stimulation, peripheral nerve stimulation, vertebral augmentation, radiofrequency nerve ablation, etc. Since Interventional Pain Management is such a juvenile specialty, very few pain management physicians and anesthesiologists have gone through specific interventional fellowships and residencies. Training in the proper patient selection and utilization of these therapies is limited. Interventionalists need to attend and participate in training programs to receive education and skill based training in options available for patients. Additionally, new guidelines are emerging.

It is important for the experts in the field to share the most current information and data available to assist physicians in selecting the right patients and right therapies to improve patient outcomes. Vital topics to be discussed are: New Innovations, Establishing Protocols, Neuromodulation, Complicated Cases, Intrathecal Drug Delivery, Conflicting Evidence and Research.

At the conclusion of this meeting, attendees will develop rational guidelines to assist in improving access to care and treatment outcomes for chronic pain patients.

Learning Objectives

- Compare the new and established techniques in interventional pain management to benefit their patients living with chronic or acute pain syndromes
- Discuss emerging trends and share the newest available data to increase the level of their state-of-the-art medical services
- Determine gaps in education and provide updated information and data to improve patient outcomes
- Present the latest in evidence based medicine to support physicians in selecting the right patients for therapies
- Provide a format for information sharing and feedback
- Review the appropriate utilization of screening options and patient selection to identify those patients at significant risk of developing addictions to controlled substance or those that may abuse, misuse or divert medications prescribed for chronic pain
